Cisco 8851 MPP Quick Reference Guide

BLF (Busy Lamp Field)

BLF lines are assigned to the line buttons on the side of your screen. They allow you to speed dial or monitor the status of other users within your organisation. Ideal for Managers, Receptionists or users who are monitoring other team members.

BLF lines will display the persons' name

1. Press a **BLF** line to speed dial the contact
2. Press a flashing **BLF** line to pick up an incoming call to that line
3. When transferring a call to a **BLF** line –
 - a. While on an active call, press **Transfer** button or **Transfer**  softkey
 - b. Press the **BLF** line button of the party you are transferring to

Park a call on to a BLF contact:

1. While on an active call, press the **Park** softkey
2. Press the BLF line where you want to park the call
3. Your screen will display ***68** followed by the extension where the call is parked (e.g.: ***686543**)
4. You will also hear the following greeting *“Your call has been parked, thank you”*

To unpark the call:

1. Press the **Unpark** soft key, then press the BLF line where the call was parked

To unpark the call from another phone:

1. Dial ***88** followed by the extension where the call was parked (e.g.: ***886543**)

If a Parked call is not retrieved by a pre-set time, it will recall back to your phone (default is 45 seconds)

Note: Park groups are set up by your Administrator

Cisco 8851 MPP Quick Reference Guide
