

Introducing the Microsoft Surface Hub

Drive innovative collaboration with the Microsoft Surface Hub, a new series of interactive team collaboration and videoconferencing devices.

Creating and brainstorming

Work together more productively than ever before. Let your ideas flow naturally and share them on a canvas as big as your imagination. Bridge physical distances across teams and never lose momentum by capturing and sharing your work where you have connectivity.

Advanced technology

Surface Hub works beautifully in the modern workplace. With its flexible size and mounting configurations, and our fully integrated design services, we can help fit the solution to your business needs.

Seamless and engaging

Surface Hub is designed to be simple and intuitive to use. Join a Skype meeting with a single tap or grab a pen to start drawing. Share content and move fluidly between document, video, audio and whiteboarding.

Integrated applications

Customise your Surface Hub with a wide array of scalable apps. Universal applications built for Windows 10 take advantage of the large screen, touch and ink input, and built-in wide range angle HD cameras and sensors.

Build your Surface Hub Bundle in 4 Simple Steps

1. Select
Optional
Remote Site
Assessment

2. Choose
